

Campbell School of Innovation Community Input Meeting • September 18, 2018

MEETING SYNOPSIS

On Tuesday September 18, 2018, Campbell Union School District held a Community Input meeting at Campbell School of Innovation, and approximately 50 CSI families and neighbors attended. District Superintendent Shelly Viramontez and Deputy Superintendent James Crawford presented information about the school’s construction timeline and shared three proposed options relating to parking, ingress/egress, and location of a school garden adjacent to the park. Then, Facilitator Barry Groves invited audience members to ask questions and offer comments, which were captured by two district staff members on charts at the front of the room. All questions asked were answered that evening, and those not wishing to ask the questions publicly were given the opportunity to write them down for individualized response. Those questions, and the district’s answers appear in the chart below.

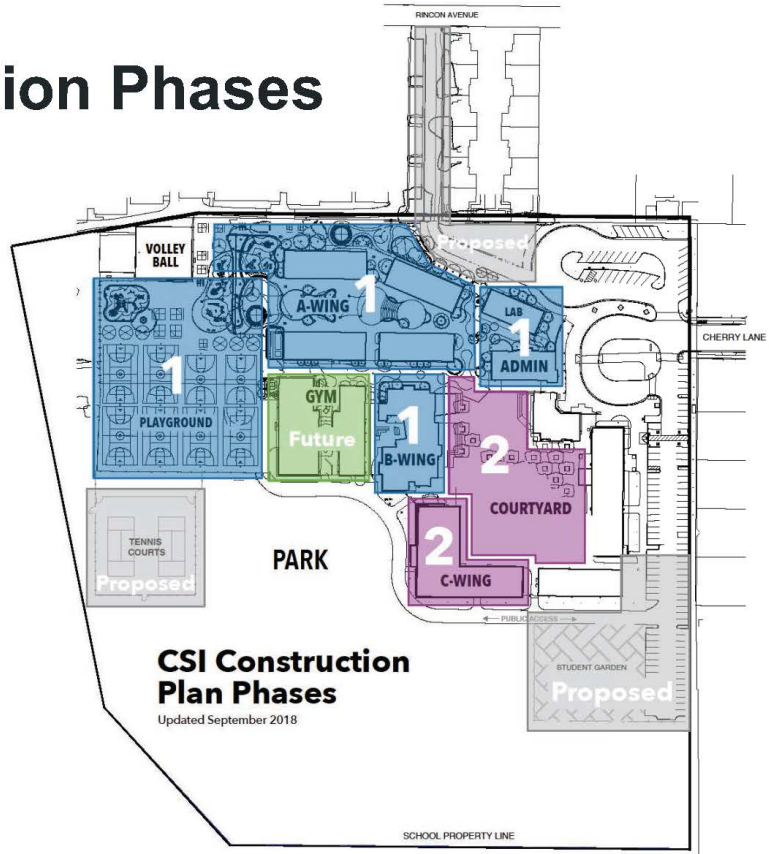

Next, the audience was asked to vote on the three options. Their preferred option would get a green dot, and the option they disliked most would get a red dot. The images presented at the meeting appear in this document.

Question & Answer Session

Category	<i>Audience Questions</i>	<i>District Responses</i>
Parking/Traffic	Concern over exit on Rincon-traffic impact especially for pick up/drop off safety issue on walking	The traffic study in spring 2019 will include opportunity to bring concerns to the City. The results will provide more direction and insight for planning.
Parking/Traffic	Has the city approved the parking?	The plans presented at the Sept. 18 meeting were proposed for community input. Our next steps include meeting with Campbell Parks & Rec re: joint use. Once a preferred plan is selected, we will work with the City Council to determine next steps, which could include an addendum to the joint use plan.
Parking/Traffic	How much more parking will there be on Cherry in the morning?	The traffic study in spring 2019 will provide more insight for answering this question.
Parking/Traffic	Is the parking area moving to the lawn area?	Current proposed plans call for adding additional parking on the district’s property and working with the City to expand parking into the grass area to reduce the demand for off-campus parking.
Parking/Traffic	Maybe option B without parking?	Based on community input, there is need for additional on-campus parking to reduce impact on neighboring streets. All 3 options presented at the meeting address that need.
<i>Parking/Traffic</i>	Need answers with the district and city as follow up	We have created a web page to assist with that communication. Additional community meetings will be scheduled in the future.
<i>Parking/Traffic</i>	Primary use of parking - staff, drop off?	The usage will include staff parking, pick up/drop off, parking for school visitors and community members using the facility.
<i>Parking/Traffic</i>	Safety with people walking - Rincon?	The upcoming traffic study will address this matter.
<i>Parking/Traffic</i>	School safety assessment - involve City	Yes, we will request the City's traffic engineer to evaluate the traffic at this school.
<i>Parking/Traffic</i>	What are we doing to slow the traffic down? Safety of students.	We will request the City's traffic engineer to evaluate the traffic at this school.

Category	Audience Questions	District Responses
<i>Parking/Traffic</i>	What will additional parking look like (net increase) on side streets?	The final plans are intended to reduce parking impact on side streets.
<i>Parking/Traffic</i>	What will happen to traffic when fully enrolled?	The traffic study in spring 2019 will provide more insight for answering this question.
<i>Ed Program</i>	When will the preschool open?	We plan to offer preschool at CSI, once the construction for that area is completed, we can submit for our license for operation. We will open once we have adequate interest/demand.
<i>Ed Program</i>	Will there be a music program? (2 questions)	CSI offers music as part of its instructional program. We will continue to seek opportunities to expand those or other desired programs of the school community as the school grows.
<i>Construction</i>	Construction timeline - what are the phases?	Please refer to images on page 3, which were shown at the meeting.
<i>Construction</i>	Next phase of construction - time of day: start/end times, Sundays-7 days a week	We will continue to request and insist that our contractors and THEIR subcontractors adhere to City of Campbell noise ordinance regulations. We encourage members of the public to notify the Campbell PD whenever a violation occurs so that enforcement can happen. Future timelines will not be as compressed as they were during summer 2018 when we were preparing for the opening of the school in August.
<i>Construction</i>	What will happen with student tiles in the courtyard?	We will try to preserve as much as we can of the existing architectural art.
<i>Campus Plan (Garden)</i>	Can the garden be separate from parking?	Yes.
<i>Campus Plan (Garden)</i>	Concern over two proposals where garden is at opposite end of campus and long distance for K students. If located next to playground suggestion to have a volunteer have it open during recess.	We do have many school gardens in the district that are some distance from the kindergarten classrooms. Schools develop procedures for garden use that take into consideration safety, scheduling, and supervision.
<i>Campus Plan (Garden)</i>	If the garden will be a community garden, how will it be secured? Access? Late night security?	Based on input from City officials and from a community meeting, there is not a high demand for a community garden at this time. The CSI garden security will be incorporated into the school's facility plan.
<i>Campus Plan (Garden)</i>	Option B won't give maximum parking capacity. Why not put garden there instead and utilize parking on option A or C? Another option is to innovate and integrate parking inside school premise (parking lot under building)	Parking under buildings would be very costly. To place gardens across from parking lots is not advisable as it presents safety issues for students and staff.
<i>Campus Plan (Garden)</i>	Will the school's garden be a community garden or a student garden?	It is planned as a student garden only. The City's current community garden does not have a waiting list, and City officials indicate there is not a high demand for a community garden at this time.
<i>Campus Plan</i>	Gym when will it be done?	The phase is dependent upon future funding. (Approx. 10 years away). It could be a renovation and not a complete reconstruction.
<i>Campus Plan</i>	How many tennis courts will there be?	Unsure at this time, but two have been proposed based on use
<i>Campus Plan</i>	What will be the building capacity?	Enrollment capacity has been set at about 850 students.
<i>Campus Plan</i>	When will playground open?	The playground is scheduled to open before the end of October.
<i>Campus Plan</i>	Will Option A have a fence for safety?	Yes, for student safety. We will ensure community access to the park.

CSI Construction Phases

Option A: Current Proposal

CAMPBELL SCHOOL OF INNOVATION - JOHN D. MORGAN PARK, CITY OF CAMPBELL
MASTER PLAN
04.26.2018

Option B

CAMPBELL SCHOOL OF INNOVATION - JOHN D. MORGAN PARK, CITY OF CAMPBELL
MASTER PLAN
09.17.18

Option C

CAMPBELL SCHOOL OF INNOVATION - JOHN D. MORGAN PARK, CITY OF CAMPBELL
MASTER PLAN
09.17.18

What's Next?

- Review community input to determine which option to pursue.
- Report results and FAQs on district website
www.campbellusd.org/csiconstruction
- CSI construction information will be reported at regular Governing Board meetings.
- Information will be posted by 9/24/18 on the website and updated as new information is available.
